DETAILED ACTION

Applicants' preliminary amendment, which included cancellation of claims 8-9 and addition of claims 13-14, filed on 6/26/2001, is made of record.

Claims 1-7 and 10-14 are now pending.

Election/Restrictions:

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-7, 10 and 13-14, drawn to compound of formula I, composition, process of making and method of use.

Group II, claim(s) 11, drawn to a process of marking a receptor using radiolabelled compound of formula I.

Group III, claim(s) 12, drawn to a process of imaging an organ using radiolabelled compound of formula I.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The requirement for unity of invention is two-fold: (1) common utility and (2) sharing a substantial structural feature disclosed as being essential to the utility. In the instant case the common utility requirement is not met with. Whereas Group I relates a

Art Unit: 1624

product, a composition, a process and a method of use of the product for the utility as therapeutic agents, Group II relates to a distinctly different utility a marking a receptor. Furthermore, marking a receptor with a radiolabelled compound is patentably distinct and in principle entails a method of use of compound of formula I. Note first recited method of use i.e. claims 13 is included in group I. Similarly, Group I and Group III have distinctly different utility. Group III relates to a process of imaging an organ which is distinctly different from method of treating diseases embraced in group I. Hence each of the group are patentably distinct.

Due to distinct nature of each of the inventions, a restriction is set forth in writing.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
